## SUMMARY

I'm a fresh graduate Bachelor of Computer Science, Majoring Information System at Gunadarma University. My current focus is seeking opportunities to secure a job where I can apply my knowledge, skills, and experience. Additionally, I am continually developing my abilities in information technology-related fields to ensure my skill set remains relevant and supports my job search.

## EDUCATION

### Bachelor's Degree of Computer Science

Gunadarma University

September 2019 – August 2023

- Majoring Information System – GPA 3.64 / 4.00

## COURSE / TRAINING

### Front-End Web Development Bootcamp

Dibimbing

July 2024 – Present

- Batch 19

## EXPERIENCES

### Project-Based Virtual Internship – Software Quality Assurance

Evermos X Rakamin Academy

January – February 2024

- Involved in Integration Test and Performance Test using K6 Tools and Flask API.
- Validating the functional accuracy of the API and ensuring its optimal performance under increased loads.

### Project-Based Virtual Internship – Fullstack Developer

Investree X Rakamin Academy

February – March 2023

- Building a RESTful API using Laravel Passport and creating a simple blog using Laravel Blade and Laravel UI.
- Implementing JWT authentication and CRUD operations, managed relationships between tables.

### Project-Based Virtual Internship – Fullstack Developer

Qwords X Rakamin Academy

December 2022 – January 2023

- Creating and designing new landing page using Laravel with Qwords website as references.

## PROJECTS / THESIS

### Usability Analysis Using Heuristic Evaluation Method on Netflix's Website

Thesis – Gunadarma University

August 2023

- Analyze usability on the Netflix website using the Heuristic Evaluation method to determine the usability quality level of the Netflix website, then calculate the results using Descriptive Analysis.
- Provide recommendation from the results in form of design that can be used as consideration for developing User Experience.

### Design and Development of Website-Based Application on Team Betta Concept's Fish Sales

College Project – Gunadarma University

August 2022

- Build and design a web-based application of Team Betta Concept's store using PHP programming and MySQL database.

## KEY SKILLS & COMPETENCIES

### Programming Language – Basic

- JavaScript; MySQL; Python; PHP

### Apps Knowledge – Basic

- VS Code; GitHub; XAMPP; Figma; Katalon

### Soft Skills

- Fast learner; problem solving; analytical skills; communication; working as team or individual

### Office – Intermediate

- Word (mailing, report, documentation)
- Excel (data lookup, serving, entry, calculation)
- PowerPoint (design and presentation)
